Church & Community

Your support has launched the Church Team into high gear. So far this year, you've helped us **recruit and train 13 Church Ignitors**, local church leaders who champion life-affirming ministry in their congregations. That's 13 churches now equipped and empowered to make an impact and help save lives!

DANIEL'S STORY: IGNITING LIFE IN WASHINGTON

"When my wife was pregnant, doctors told us our son wouldn't survive and strongly pressured us to terminate. But we chose life and today, he's a healthy, thriving boy. That experience showed me just how often women face fear, pressure, and hopelessness.

Now, as a Church Ignitor with Save the Storks, I'm helping local churches offer women real choices: support, ultrasounds, adoption resources, and post-abortion healing. Together, we're building a life-affirming movement in our community.

Please pray for this mission and join us in standing for life."

24/7 Digital Highway

Because of your generosity, **105,984 women have started conversations** through our AI-powered chat this year, many opening up about questions they felt too scared or ashamed to ask anywhere else. Each chat represents a woman choosing truth, clarity, and hope, because you made that safe space possible.

IMPACT STORY: WHEN A WHISPER BECAME A LIFELINE

A quiet direct message came through TikTok: *"I noticed you give advice for women... can I ask you something? I can't talk to my mom."*

She was scared, unsure who to trust, but brave enough to reach out. That single message connected her to accurate information, real support, and the care she needed.

Because of our digital presence, and your support, we were there in her moment of need. You helped turn fear into clarity, isolation into hope. Every click matters. Every question counts.

IMPACT STORY: HOPE ON THE ROAD IN RURAL LOUISIANA

In West Carroll Parish, a maternal healthcare desert, women are quietly searching for abortion pills. With no OB/GYNs and limited transportation, options feel scarce.

That's why Lyndsey Sikes, Executive Director of Pregnancy Health Clinic in Monroe, partnered with Save the Storks to bring care to them. Their Mobile Medical Clinic now reaches women in remote corners, offering ultrasounds, support, and hope.

On their first outreach trip, they met six women, including one who had just taken the abortion pill. While it was too late for her baby, it wasn't too late for her healing. Lyndsey reminded her she's not alone—and never will be.

"This is unlike anything I've seen in 20 years," Lyndsey shares. "But now we can go where no care exists."

Thanks to your support, hope is on the move.

Thank you for standing for

life, for moms, and for the next generation. When you give, you're not just supporting life, you're meeting women in their moment of need with compassion, truth, and care.
